

Sample Diagnostics (fictitious test laboratory)

TEST DATA — NOT A REAL MEDICAL REPORT. FOR SOFTWARE TESTING ONLY.

Heart and Vascular Function: ECG, Holter, Echocardiography, ABI, Pulse Wave Velocity, Ambulatory Blood Pressure

Patient	Test User (SAMPLE)	Age / Sex	34 Y / Male
Patient ID	TST-000123	Referred by	Self
Collected	20-Sep-2026	Reported	20-Sep-2026
Method	12-lead ECG; 24-h Holter; TTE; oscillometric ABP; SpHgm; Cor cf-SpVes; 24-h ABPM		

Test	Result	Unit	Reference range	Flag
Resting heart rate (ECG)	61	bpm	50 – 100	
QTc (ECG)	418	ms	< 450	
Atrial fibrillation burden (Holter)	0	%	0	
PVC burden (Holter)	0.4	%	< 1	
E/e' ratio (echo)	7.2		< 14	
Left atrial volume index (echo)	26	mL/m ²	16 – 34	
Ankle-brachial index	1.12	ratio	1.00 – 1.40	
Pulse wave velocity (carotid-femoral)	8.9	m/s	< 10	
Daytime ambulatory SBP (ABPM)	136	mmHg	< 135	H
Daytime ambulatory DBP (ABPM)	86	mmHg	< 85	H
Nocturnal BP dip (ABPM)	6	%	10 – 20	L

Interpretation / notes

Sinus rhythm. Structurally normal heart with normal diastolic function.
24-h ABPM: daytime mean 136/86 mmHg (hypertension by ABPM criteria) with a non-dipping nocturnal profile.
Arterial stiffness at the upper end of normal for age.

Electronically generated sample report. Fictitious laboratory and patient.
