

# Sample Diagnostics (fictitious test laboratory)

TEST DATA — NOT A REAL MEDICAL REPORT. FOR SOFTWARE TESTING ONLY.

## Functional Medicine: Cortisol Rhythm and Organic Acids

|            |                                             |             |             |
|------------|---------------------------------------------|-------------|-------------|
| Patient    | Test User (SAMPLE)                          | Age / Sex   | 34 Y / Male |
| Patient ID | TST-000123                                  | Referred by | Self        |
| Collected  | 22-Sep-2026                                 | Reported    | 22-Sep-2026 |
| Method     | Salivary ELISA; urinary organic acids GC-MS | Sample      | See test    |

| Test                          | Result | Unit           | Reference range | Flag |
|-------------------------------|--------|----------------|-----------------|------|
| Cortisol awakening response   | 28     | %              | 38 – 75         | L    |
| Late-night salivary cortisol  | 5.2    | nmol/L         | < 4.0           | H    |
| 8-OHdG (oxidative DNA damage) | 5.6    | ng/mg creat    | < 4.5           | H    |
| Pyroglutamic acid             | 46     | mmol/mol creat | < 40            | H    |
| Kynurenic acid                | 4.1    | mmol/mol creat | < 6             |      |
| 5-HIAA                        | 6.2    | mmol/mol creat | 3.8 – 12        |      |

### Interpretation / notes

Blunted morning cortisol rise with raised late-night cortisol (flattened rhythm).  
Functional-medicine markers: research-grade, interpret with clinical context.

Electronically generated sample report. Fictitious laboratory and patient.
