TELOMY

Brand Architecture

Version 1.0 · 28 September 2026 · Anshuman Kumar, Founder

---

1. Brand Statement

Telomy is a human longevity and physiological intelligence company. We make the invisible biology of the human body measurable, understandable, and actionable — through wearable biosensors, an adaptive AI companion, and clinician-in-loop decision support.

The name Telomy carries two meanings simultaneously. It references telomeres — the cellular caps that mark biological ageing — and it reads phonetically as "tell-o-me" — the body telling you what it knows. Both meanings are intentional. Both inform every design and product decision.

2. Positioning Statement

“Where human biology becomes intelligent.”

3. Master Brand

Brand name: Telomy

Wordmark treatment: Thin geometric capitals with wide letter-spacing. Signature detail: the letter E is drawn as three floating horizontal bars with no vertical spine — a distinctive letterform to be developed by the designer.

Companion AI: Sinc — subordinate to Telomy. Referenced as "Telomy, powered by Sinc" or "Sinc, the AI inside Telomy". Sinc is a character within the Telomy system, not a co-brand.

Palette: Black, graphite, off-white, pure white — with a restrained accent in electric blue, silver, or iridescent (designer's choice, one of the three).

4. Product Family Architecture

Every product in the Telomy family carries the master-brand prefix, followed by a single English descriptor. Hardware iterations are numbered sequentially.

Line	Purpose	Positioning line
Telomy Labs	R&D, clinical validation, publications, N-of-1 study platform	Where the evidence is built
Telomy Band	Smart wristband biosensor — primary consumer hardware	Continuous physiological sensing
Telomy Patch	Chest-mounted biosensor for extended metrics (ECG, HRV, respiration)	Clinical-grade continuous monitoring
Telomy Ring	Smart ring form factor for aesthetic-first users	The signal, invisibly worn
Telomy Vault	Personal biological data platform and long-term storage	Your body's memory, kept

		private
Telomy Halo	Adaptive recovery chamber (PEMF, audio, thermal) — evolution of the Bonphul PEMF bed	Recovery, tuned by biology
Telomy Care	Clinician-facing SaaS: patient triage, AI-flagged insights, decision support	For the clinician's decision
Telomy Formulas	Clinician-recommended nutraceuticals — Wind-Down, Calm, Recover	Prescribed, not marketed

5. Naming Rules

Do

- Prefix every product with "Telomy" — one-word master brand, then a single English descriptor.
- Number hardware iterations sequentially: Telomy Band 01, 02, 03.
- Refer to the AI companion as Sinc. Never call it "Telomy AI" — the AI has a name.
- Use plain English descriptors: Band, Patch, Ring, Vault, Halo, Care, Formulas, Labs.

Do not

- Do not create sub-brands with independent names (no "Aegis by Telomy", no "Nova Ring by Telomy").
- Do not use hyphens or camelCase ("Telomy-Band" and "TelomyBand" are both wrong).
- Do not use the word "Telomere" or "Telomeric" in product names — this creates unnecessary regulatory exposure without a corresponding measurement claim.
- Do not describe products using medical or diagnostic language that overstates actual capability.

6. The Companion AI — Sinc

Sinc is Telomy's AI companion. It is an adaptive, event-tagged interpretive layer that translates continuous biosignals into daily guidance. Sinc is not a separate brand. It is a named character within the Telomy system, in the way JARVIS is named within the Iron Man universe.

Voice: warm, precise, and deferential to clinician judgment on high-stakes matters.

Reference format: "Ask Sinc." · "Sinc noticed ..." · "Sinc, translate this pattern."

Never say: "Telomy AI", "the AI", or "the assistant". Always name it Sinc.

7. Voice & Tone

Attribute	Standard
Tone	Warm-scientific: rigorous, quietly confident, never breathless
Language	Plain English by default; scientific terms only when they add clarity
Claims	Evidence-graded. Always cite sources for medical statements
Emotion	Human, calm, curious; never sales-y, never alarmist
Confidence	Show confidence intervals and data ranges; hide none

Bias to	Understatement over overstatement. Precision over promise

8. What Telomy Is Not

Clarity comes from constraint. Telomy is defined as much by what it refuses to be:

- NOT a DTC-quiz supplement brand (like Care/of, Rootine).
- NOT a diagnostic mail-in testing kit (like TeloYears, InsideTracker).
- NOT a telemedicine service (like Teladoc, Practo).
- NOT a fitness tracker (like Fitbit, Garmin).
- NOT a spiritual or meditative wellness brand (like Calm, Headspace).

Telomy is a longevity intelligence platform: hardware, an AI companion, and clinician oversight — for people who want to understand their biology and make better decisions across decades.

9. Competitive Reference Set

Telomy's reference peers, in order of relevance, are Function Health, Levels, Ultrahuman, Superpower, InsideTracker, OneTwenty, and Ammortal. Telomy is not any of these. It is closer to "Function Health for continuous physiology" than to any single competitor.

10. Extensions to Explore Later

- Telomy Clinic — physical retail clinics for premium screenings and Halo sessions.
- Telomy Academy — certified biohacking and functional-medicine courses.
- Telomy Institute — research foundation, peer-reviewed publications, open protocols.

11. Historical Codename

During development the platform was codenamed LongySinc (also written LongiSync). This codename is retired as of 28 September 2026. All new deliverables use Telomy exclusively; all legacy deliverables will be re-versioned progressively.
