# TELOMY

Brand Identity Brief for Designer

*Version 1.0 · 28 September 2026 · Anshuman Kumar, Founder*

---

## 1. About Telomy

Telomy is a longevity intelligence platform. We build wearable biosensors, an AI companion, and clinician workflow tools that translate the body's invisible signals into daily guidance for a longer, healthier life.

The brand name references telomeres — the DNA sequence marking biological ageing — and reads phonetically as "tell-o-me" — the body communicating with you. Both meanings are intentional and both should be legible in the identity system.

Founded by Anshuman Kumar in Noida, India. Domain telomy.com is registered.

## 2. What We Need

A complete brand identity system, delivered as a design package with the following components:

- Primary logo lockup — wordmark with the mark.
- Icon-only mark — for favicon, app icon, product engraving.
- Wordmark-only version — for text-only contexts.
- Monochrome variant — black on white and white on black.
- Reversed variant — for dark UI, patch prints, product surfaces.
- Small-scale variant — 16×16 favicon, 24×24 app tab, 32×32 icon.
- Colour system — hex, RGB, CMYK, Pantone.
- Typography system — primary heading, primary body, secondary.
- Iconography direction — the data / signal / longevity visual language.
- Motion behaviour — for app launch and web hero.
- Brand book — PDF, 20–30 pages, documenting all rules.

## 3. The Name Story

Two meanings, both intentional, both should carry into the visual system:

**Telomere** — the biological cap on chromosomes that shortens with ageing. Rich in scientific credibility. This is where longevity science lives.

**Tell-o-me** — the body's quiet communication, decoded. This is where human warmth lives.

The identity must carry both. Neither should dominate. The visual system should feel scientific but human, futuristic but timeless.

## 4. Brand Direction & Feel

| Attribute | Yes | No |
|---|---|---|
| Feel | Premium, scientific, futuristic, precise, timeless | Trendy, wellness-generic, cutesy |
| Category cues | Longevity science, biosignal, data intelligence | Anti-ageing cream, sports fitness, spa |
| Personality | Quietly confident, curious, human, rigorous | Loud, alarmist, sales-y, mystic |
| Reference peers | Function Health, Levels, Ultrahuman, Oura | Care/of, Rootine, Fitbit, Calm |

## 5. Visual Reference Direction

Three reference images have been shared separately with the designer. Guidance for each:

- Reference 1 (elegant calligraphic infinity, thin brush stroke): NOT the direction. Too boutique-wellness, not tech.
- Reference 2 (infinity with vertical waveform bars inside, geometric wordmark on black): YES — this is the target direction.
- Reference 3 (particulate/dissolving infinity, white on black): interesting for future motion behaviour; not for the primary static identity.

A concept SVG has also been delivered by the founder as a visual anchor. Refine, do not copy. The founder's SVG uses off-the-shelf fonts; the designer is expected to build custom letterforms for the wordmark.

## 6. Palette Direction

| Role | Colour | Hex |
|---|---|---|
| Primary base | Pure black | #0A0A0A |
| Primary secondary | Graphite | #1A1D1F |
| Primary light | Off-white | #F5F5F3 |
| Primary contrast | Pure white | #FFFFFF |
| Accent (choose ONE) | Electric blue OR silver OR iridescent | Designer to specify |

### Forbidden colours

- Warm gold — reads as luxury spa, not longevity science.
- Medical red — reads as hospital and emergency.
- Hospital green — reads as pharma and clinical waste.
- Wellness beige — reads as generic yoga studio.
- Pastel anything — reads as consumer beauty product.

## 7. Typography Direction

- Geometric sans-serif family.
- Thin/light weights (100–300 primary; 400 maximum).
- Wide letter-spacing on the wordmark and on section headers.

- Distinctive letterform treatment on the E in TELOMY: horizontal bars do not connect to the vertical spine. The E is drawn as three floating horizontal bars, no vertical stroke. This is a signature of the brand.
- Reference fonts to consider as starting points: Michroma, Orbitron (light weight), custom-drawn.

## 8. Iconography Direction

- Infinity motif as a recurring visual anchor — references longevity and the DNA loop.
- Signal / waveform pattern for data-heavy contexts (dashboards, reports).
- Extremely thin line weights (1–1.5px at reference size).
- Never use: crosses, hearts, standard ECG line, leaves, sun rays, chakra symbols, hands, DNA-helix cliché from stock libraries.

## 9. Do

- Design custom letterforms from scratch — do not rely on off-the-shelf fonts for the wordmark.
- Make the mark work at 16×16 pixels and 400×400 pixels with equal clarity.
- Deliver source files: Figma, AI (Illustrator), SVG, PNG (×1, ×2, ×3).
- Include usage guidelines: minimum size, clear space, incorrect uses.
- Design in both light and dark modes from the start — Telomy will be seen on both.

## 10. Do Not

- Do not use stock DNA-helix imagery.
- Do not use an ECG line as a graphic element.
- Do not add coloured glows, gradients, or drop shadows to the primary mark.
- Do not hyphenate Telomy-anything.
- Do not treat Sinc as a co-brand — Sinc is a companion AI referenced by name only, never with its own logo.

## 11. Deliverables

| Item | Format |
|---|---|
| Primary logo — colour and mono | SVG, PDF, PNG (×1/×2/×3), EPS |
| Icon-only mark | SVG, PDF, PNG (×1/×2/×3), ICO favicon |
| Product family lockups (Band, Patch, Ring, Vault, Halo, Labs, Care, Formulas) | SVG, PDF |
| Wordmark alone | SVG, PDF |
| Colour system reference sheet | PDF |
| Typography specification | PDF |
| Brand book | PDF (20–30 pages) |
| Motion samples for app launch | MP4 and Lottie JSON |

| | |
|---|---|
| Source files | Figma + Illustrator |

## 12. Budget & Timeline

**Budget:** ₹80,000 – ₹2,00,000 (INR). Willing to pay top of range for a designer who can deliver a genuinely distinctive identity.

**Timeline:** 3–4 weeks from kickoff to first round; 4–6 weeks total including revisions.

**Suggested designers to approach:** Codesign (Mumbai), Turmeric Design (Bangalore), Elephant Design (Pune), or an experienced independent from Behance / Dribbble with health-tech or luxury-tech portfolio.

## 13. Founder Contact

**Anshuman Kumar**
Founder, Telomy

Based: Noida, India

## 14. Attachments

- Telomy Brand Architecture v1.0 (companion document — product family and naming rules).
- Telomy Trademark Filing Brief v1.0 (companion document — legal filing context).
- Concept SVG logo (founder's direction anchor, not a final).
- Three reference images (as described in section 5).
