

Sample Diagnostics (fictitious test laboratory)

TEST DATA — NOT A REAL MEDICAL REPORT. FOR SOFTWARE TESTING ONLY.

Biological Age — Epigenetic Clocks & Pace of Ageing

Patient	Test User (SAMPLE)	Age / Sex	34 Y / Male
Patient ID	TST-000123	Referred by	Self
Collected	25-Sep-2026	Reported	25-Sep-2026
Method	Illumina EPIC methylation array / qPCR	Sample	See test

Test	Result	Unit	Reference range	Flag
Chronological age	34.2	years	—	
PhenoAge (Levine 2018)	37.9	years	≤ chronological	H
GrimAge v2	38.6	years	≤ chronological	H
Horvath clock (2013)	35.1	years	≤ chronological	
DunedinPACE	1.12	years/year	< 1.00	H
Telomere length (qPCR, T/S ratio)	0.92	T/S	0.95 – 1.40	L
Immune age (IEAA)	+2.1	years	≤ 0	H
Inflammation clock (CRP-methylation)	+1.8	SD	< 0	H

Interpretation / notes

Biological age estimates exceed chronological age by 1–4 years; pace of ageing 12 % above average. Pattern is commonly associated with inflammation, insulin resistance and poor sleep.

Electronically generated sample report. Fictitious laboratory and patient.
